RE: AVAILABILITY OF CHOLETEC™ (MEBROFENIN) – KIT FOR THE PREPARATION OF TECHNETIUM Tc-99m

Dear valued customer,

BRACCO IMAGING Canada is pleased to inform you that a new lot of Canadian Choletec™ (Mebrofenin) was received at our Montreal facility. We immediately shipped and fulfilled the request for products to Canadian facilities who had an order with BRACCO. If your facility requires a kit for the preparation of Technetium Tc-99m, we invite you to place an order via BRACCO's Order Desk at 1-800-465-5820 ext. 5333 or via email at customerservicesca@bracco.com.

It is important to note that BRACCO IMAGING Canada has received a quantity of Choletec equivalent to the annual demand for Mebrofenin and Disofenin, based on available market information. Nevertheless, we at BRACCO have noticed an increase in the demand over the last months. We are working to put a permanent solution in place that will ensure availability of an adequate inventory for 2019 and beyond as we gather additional information about the situation and market trends.

BRACCO IMAGING Canada apologizes for the inconvenience caused by this shortage, and thanks you for your understanding.

If you have any questions, do not hesitate to contact me by phone (1-800-465-5820 ext. 5303) or email (patrice.plourde@bic.bracco.com).

Respectfully,

A handwritten signature in blue ink, appearing to read "Patrice Plourde".
