Re: Availability of Stannous PYP Kit

The Calgary Radiopharmaceutical Centre (CRC) holds a Drug Establishment Licence and produces a few niche radiopharmaceutical products. At this time the CRC is the only supplier in Canada of a stannous pyrophosphate kit (Stannous PYP Kit) for the preparation of Technetium Tc99m pyrophosphate.

Stannous PYP Kit is supplied as a frozen product with a shelf life of 6 months from manufacture date. The product is transported in dry ice and is shipped by air overnight. Stannous PYP Kit must be stored at -10°C or lower immediately upon receipt.

Product pricing and estimated shipping costs will be provided upon request. Further information and orders can be placed by email to CalgaryRadioPharm@ahs.ca.

Information required for placing an order includes:

- # of vials requested
- Purchase order number
- Hospital shipping and billing address
- contact name, phone number, and fax number.
- Email address

An order form and product insert has been attached.

Regards

Ingrid Koslowsky
Director, CRC
